Portfolio | **LinkedIn** | **GitHub**

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years of hands-on experience building and supporting production mobile, web, and API-driven systems across fintech, government, healthcare, hospitality, e-commerce, and revenue platforms. Experienced across the software lifecycle including development, API integration, testing, technical documentation, deployment, maintenance, and collaborative code review. Strong with React, Node.js, React Native, Flutter, PHP/Laravel, C#/.NET, SQL, REST APIs, and cloud-connected applications. Comfortable working remotely in collaborative Git-based teams and translating business requirements into reliable, maintainable software.

CORE COMPETENCIES

Full-Stack Development • Mobile App Development • REST APIs • C#/.NET • Angular • React • Node.js • Database Design • Payment Integration • Multi-Tenant Platforms • Software Testing • Technical Documentation • Git/GitHub • Agile/Scrum • Code Review • System Maintenance & Troubleshooting

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, C#, Java, PHP, Python, Dart
Frontend	React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Shadcn/UI
Backend	Node.js, Express.js, C#/.NET, ASP.NET Core, Laravel, PHP, REST APIs, GraphQL
Mobile	React Native (Expo), Flutter, Android (Java, XML/Jetpack Compose)
Databases	MySQL, PostgreSQL, MongoDB, Firebase Firestore, Redis
Cloud & DevOps	Firebase, Vercel, Docker (basics), CI/CD, GitHub Actions
APIs & Integrations	M-Pesa Daraja, Google APIs, Firebase Auth, SendGrid, Stripe (basics)
Testing & Tools	Jest, Cypress, Selenium, PyTest, Postman, Git/GitHub, VS Code, Visual Studio, Android Studio
Practices	Clean Architecture, MVC/MVVM, RBAC, Multi-Tenancy, Agile/Scrum, Code Review, Documentation

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer · Samarik Tech LLC

Oct 2026 – Present · Remote / Texas, USA

- Develop, test, and maintain software projects while contributing to reliable, maintainable production code.
- Prepare and maintain technical documentation covering implementation details, workflows, and project changes.
- Work across backend and frontend codebases, reviewing existing systems and implementing improvements within collaborative Git-based workflows.
- Contribute to the KBills platform and related software initiatives using modern web and backend technologies.

Software Developer · Bayan Systems

May 2026 – Oct 2026 · Remote / Somalia

- Contributed as a full-stack developer on MuniCore, a multi-tenant digital revenue platform for municipal governments.
- Collaborated on core modules including the Billing Engine and Citizen 360 profile system.
- Built a companion mobile application for field collectors supporting on-the-ground revenue collection.
- Strengthened authentication and session security and contributed to dashboard/navigation interfaces aligned with an enterprise design system.
- Worked closely with the development team through structured code review and pull-request workflows.

IT Officer & Mobile App Developer · Nobel Lending Limited

Jan 2026 – May 2026 · Nairobi, Kenya

- Built and maintained a production mobile lending application supporting loan origination, repayment tracking, and client management.
- Integrated the M-Pesa Daraja API for mobile payments and improved transaction processing workflows.
- Engineered performance optimizations and continuous monitoring while supporting system reliability.
- Provided Tier 1 and Tier 2 technical support, resolving infrastructure, software, and connectivity issues.

Software Developer · Veriscore Limited

Sep 2025 – Jan 2026 · Nairobi, Kenya

- Co-built a real-time Credit Scoring Engine for automated financial risk assessment, including backend logic, scoring algorithms, API integrations, and data pipelines.
- Optimized database queries and processing pipelines to support fast credit evaluation.
- Contributed to system design and architecture decisions focused on scalability and reduced processing latency.
- Delivered in an agile environment with sprint reviews, code reviews, and collaborative debugging.

Freelance Full-Stack Developer · Self-Employed

2020 – Present · Nairobi, Kenya / Remote

- Designed, built, and deployed 10+ end-to-end applications across healthcare, hospitality, travel, education, and e-commerce.
- Built cross-platform mobile apps and scalable web systems using React Native, Flutter, React.js, Node.js, and Laravel.
- Integrated payment gateways, push notifications, authentication, and third-party APIs while managing projects from requirements through launch.
- Maintained client relationships through post-launch updates, performance tuning, troubleshooting, and feature expansion.

SELECTED PROJECTS

- **Lotus Fertility App** — Healthcare/surrogacy lifecycle management platform — React Native + Firebase
- **Raka BnB** — Property booking and reservation management system — React + Node.js
- **Nairobi Beauty World** — Appointment and service management platform for a beauty business
- **Rocky Driving School** — Student enrollment and training progress tracking system
- **Namelok Adventures** — Travel and tour booking platform with integrated payments
- **E-commerce Platform** — Online store with M-Pesa and card payment integration

EDUCATION

BSc. Computer Information Systems — Kenya Methodist University
2021 – 2024 | Second Class Honours, Upper Division | GPA: 3.25

CERTIFICATIONS

Programming Essentials in Python · JavaScript · C++ — Cisco Networking Academy
Mobile Application Development Bootcamp — Innovators Club
